ACADEMIC REGULATIONS & CURRICULUM

Applicable to the students admitted from the Academic Year 2023-2024

COMPUTER SCIENCE AND ENGINEERING (ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING)

(B.Tech. Programme)

MAHARAJ VIJAYARAM GAJAPATHI RAJ COLLEGE OF ENGINEERING

(Autonomous)

(Approved by AICTE, New Delhi, and permanently affiliated to JNTUGV, Vizianagaram) Listed u/s 2(f) & 12(B) of UGC Act 1956.

Vijayaram Nagar Campus, Chintalavalasa, Vizianagaram-535005, Andhra Pradesh

The visionaries

Late Dr. P V G Raju
Raja Saheb of Vizianagaram
Founder Chairman-MANSAS
Ex-Minister for Education and Health, Govt. of AP
Ex Member of Parliament

Late Dr. P. Anand Gajapathi Raju Ex-Chairman-MANSAS Ex-Minister for Education and Health Govt. of AP Ex Member of Parliament

P. Ashok Gajapathi Raju Chairman-MANSAS Ex-Union Minister for Civil Aviation, Govt. of India Ex-Minister for Finance, Govt. of AP

Academic Regulations (R23) for B. Tech (Regular-Full time)

(Effective for the students admitted into I year from the Academic Year 2023-24 onwards)

1. Award of the Degree

- (a) Award of the B.Tech. Degree / B.Tech. Degree with a Minor if he/she fulfills the following:
 - Pursues a course of study for not less than four academic years and not more than eight academic years. However, for the students availing Gap year facility this period shall be extended by two years at the most and these two years would in addition to the maximum period permitted for graduation (Eight years).
 - (ii) Registers for 160 credits and secures all 160 credits.

(b) Award of B.Tech. degree with Honors

A student will be declared eligible for the award of the B.Tech. with Honors if he/she fulfills the following:

- (i) Student secures additional 15 credits fulfilling all the requisites of B.Tech. program i.e., 160 credits.
- (ii) Registering for Honors is optional.
- (iii) Honors is to be completed simultaneously with B.Tech. programme.
- 2. Students, who fail to fulfill all the academic requirements for the award of the degree within eight academic years from the year of their admission, shall forfeit their seat in B.Tech. course and their admission stands cancelled. This clause shall be read along with clause 1 a) i).

3. Admissions

Admission to the B. Tech Program shall be made subject to the eligibility, qualifications and specialization prescribed by the A.P. State Government/University from time to time. Admissions shall be made either based on the merit rank obtained by the student in the common entrance examination conducted by the A.P. Government/University or any other order of merit approved by the A.P. Government/University, subject to reservations as prescribed by the Government/University from time to time.

4. Program related terms

Credit: A unit by which the course work is measured. It determines the number of hours of instruction required per week. One credit is equivalent to one hour of teaching (Lecture/Tutorial) or two hours of practical work/field work per week.

Credit definition:

1 Hr. Lecture (L) per week	1 credit
1 Hr. Tutorial (T) per week	1 credit
1 Hr. Practical (P) per week	0.5 credit
2 Hrs. Practical (Lab) per week	1 credit

- a) *Academic Year*: Two consecutive (one odd + one even) semesters constitute one academic year.
- b) *Choice Based Credit System (CBCS):* The CBCS provides a choice for students to select from the prescribed courses.

5. Semester/Credits:

- i. A semester comprises 90 working days and an academic year is divided into two semesters.
- ii. The summer term is for eight weeks during summer vacation. Internship/apprenticeship / work-based vocational education and training can be carried out during the summer term, especially by students who wish to exit after two semesters or four semesters of study.
- iii. Regular courses may also be offered during the summer on a fast-track mode to enable students to do additional courses or complete backlogs in coursework.
- iv. The Universities/HEIs can decide on the courses to be offered in the summer term depending on the availability of faculty and the number of students.

6. Structure of the Undergraduate Programme

All courses offered for the undergraduate program (B. Tech.) are broadly classified as follows:

S.No.	Category	Breakup of Credits (Total 160)	Percentage of total credits	AICTE Recommendation (%)
1.	Humanities and Social Science	13	8 %	8 - 9%
	including Management (HM)			
2.	Basic Sciences (BS)	20	13 %	12 - 16%
3.	Engineering Sciences (ES)	23.5	14%	10 - 18%
4.	Professional Core (PC)	54.5	34 %	30 - 36%
	Electives – Professional (PE) & Open (OE); Domain Specific Skill Enhancement Courses (SEC)	33	21 %	19 - 23%
6.	Internships & Project work (PR)	16	10 %	8 – 11%
7.	Mandatory Courses (MC)	Non-credit	Non-credit	-

7. Course Classification:

All subjects/ courses offered for the undergraduate programme in Engineering & Technology (B.Tech. degree programs) are broadly classified as follows:

S.No.	Broad Course Classification	Course Category	Description
1.	Foundation Core Courses		Includes Mathematics, Physics and Chemistry; fundamental engineering courses; humanities, social sciences and management courses
2.	Core Courses	Professional Core Courses (PC)	Includes subjects related to the parent discipline /department / branch of Engineering
			Includes elective subjects related to the parent discipline/department/ branch of Engineering
3.	Elective	Open Elective	Elective subjects which include interdisciplinary subjects or subjects in an area outside the parent discipline/ department/ branch of Engineering
	Courses		interdisciplinary/job-oriented/domain courses which are relevant to the industry
		Project	B.Tech. Project or Major Project
4.	Project & Internships	Internships	Summer Internships – Community based and Industry Internships; Industry oriented Full Semester Internship
5.	Audit Courses		Covering subjects of developing desired attitude among the learners

8. Programme Pattern

- i. Total duration of the B. Tech (Regular) Programme is four academic years.
- ii. Each academic year of study is divided into two semesters.
- iii. Minimum number of instruction days in each semester is 90 days.
- iv. There shall be mandatory student induction program for fresher's, with three-week duration before the commencement of first semester. Physical activity, Creative Arts, Universal Human Values, Literary, Proficiency Modules, Lectures by Eminent

- People, Visits to local Areas, Familiarization to Dept./Branch & Innovations etc., are included as per the guidelines issued by AICTE.
- v. Health/wellness/yoga/sports and NSS /NSS /Scouts & Guides / Community service activities are made mandatory as credit courses for all the undergraduate students.
- vi. Courses like Environmental Sciences, Indian Constitution and Technical Paper Writing & IPR are offered as non-credit mandatory courses for all the undergraduate students.
- vii. Designs Thinking for Innovation & Tinkering Labs are made mandatory as credit courses for all the undergraduate students.
- viii. Increased flexibility for students through an increase in the elective component of the curriculum, with 05 Professional Elective courses and 04 Open Elective courses.
- ix. Professional Elective Courses, include the elective courses relevant to the chosen specialization/branch. Proper choice of professional elective courses can lead to students specializing in emerging areas within the chosen field of study.
- x. A total of 04 Open Electives are offered in the curriculum. A student can complete the requirement for B.Tech. Degree with a Minor within the 160 credits by opting for the courses offered through various verticals/tracks under Open Electives.
- xi. While choosing the electives, students shall ensure that they do not opt for the courses with syllabus contents similar to courses already pursued.
- xii. A pool of interdisciplinary/job-oriented/domain skill courses which are relevant to the industry are integrated into the curriculum of all disciplines. There shall be 05 skill-oriented courses offered during III to VII semesters. Among the five skill courses, four courses shall focus on the basic and advanced skills related to the domain/interdisciplinary courses and the other shall be a soft skills course.
- xiii. Students shall undergo summer internships, for a minimum of eight weeks duration at the end of second and third year of the program. The internship at the end of second year shall be community oriented and industry internship at the end of third year.
- xiv. There shall also be full internship in the final semester of the program along with the project work.
- xv. Undergraduate degree with Honors is introduced for the students having good academic record.
- xvi. Each college shall take measures to implement Virtual Labs (https://www.vlab.co.in) which provide remote access to labs in various disciplines of Engineering and will help student in learning basic and advanced concept through remote experimentation. Student shall be made to work on virtual lab experiments during the regular labs.
- xvii. College shall assign a faculty advisor/mentor after admission to a group of students from same department to provide guidance in courses registration/ career growth / placements / opportunities for higher studies/ GATE/ other competitive exams etc.
- xviii. Preferably 25% of course work for the theory courses in every semester shall be conducted in the blended mode of learning.

9. Evaluation Process

The performance of a student in each semester shall be evaluated subject wise with a maximum of 100 marks for theory and 100 marks for practical subject. Summer Internships shall be evaluated for 50 marks, Full Internship &Project work in final semester shall be evaluated for 200 marks, mandatory courses with no credits shall be evaluated for 30 mid semester marks.

A student has to secure not less than 35% of marks in the end examination and a minimum of 40% of marks in the sum total of the Continuous Internal Evaluation and Semester end examination marks taken together for the theory, practical, design, drawing subject or project etc. In case of a mandatory course, he/she should secure 40% of the total marks.

THEORY COUSES

Assessment Method	Marks
Continuous Internal Evaluation	30
Semester End Examination	70
Total	100

- i. For theory subject, the distribution shall be 30 marks for Internal Evaluation and 70 marks for the End-Examination.
- ii. For practical subject, the distribution shall be 30 marks for Internal Evaluation and 70 marks for the End- Examination.
- iii. If any course contains two different branch subjects, the syllabus shall be written in two parts with 3 units each (Part-A and Part-B) and external examination question paper shall be set with two parts each for 35 marks.
- iv. If any subject is having both theory and practical components, they will be evaluated separately as theory subject and practical subject. However, they will be given same subject code with an extension of "T" for theory subject and "P" for practical subject.

a) Continuous Internal Evaluation

- i. For theory subjects, during the semester, there shall be two midterm examinations. Each midterm examination shall be evaluated for 30 marks of which 10 marks for objective paper (20 minutes duration), 15 marks for subjective paper (90 minutes duration) and 5 marks for assignment.
- ii. Objective paper shall contain for 05 short answer questions with 2 marks each. Subjective paper shall contain 3 either or type questions (totally six questions from 1 to 6) of which student has to answer one from each either or type of questions. Each question carries 10 marks. The marks obtained in the subjective paper are condensed to 15 marks.
- iii. First midterm examination shall be conducted for I, II units of syllabus with one either or type question from each unit and third either or type question from both the units. The second midterm examination shall be conducted for III, IV and V units with one either or type question from each unit.
- iv. Final mid semester marks shall be arrived at by considering the marks secured by the student in both the mid examinations with 80% weightage given to the better mid exam and 20% to the other.

For Example:

Marks obtained in first mid: 25 Marks obtained in second mid: 20

Final mid semester Marks: (25x0.8) + (20x0.2) = 24

If the student is absent for any one midterm examination, the final mid semester marks shall be arrived at by considering 80% weightage to the marks secured by the student in the appeared examination and zero to the other. For Example:

Marks obtained in first mid: Absent Marks obtained in second mid: 25

Final mid semester Marks: (25x0.8) + (0x0.2) = 20

b) End Examination Evaluation:

End examination of theory subjects shall have the following pattern:

- i) There shall be 6 questions and all questions are compulsory.
- ii) Question I shall contain 10 compulsory short answer questions for a total of 20 marks such that each question carries 2 marks.
- iii) There shall be 2 short answer questions from each unit.
 - a) In each of the questions from 2 to 6, there shall be either or type questions of 10 mark each. Student shall answer any one of them.
- iv. The questions from 2 to 6 shall be set by covering one unit of the syllabus for each question.

End examination of theory subjects consisting of two parts of different subjects, *for example*: Basic Electrical &Electronics Engineering shall have the following pattern:

- i. Question paper shall be in two parts viz., Part A and Part B with equal weightage of 35 marks each.
- ii. In each part, question 1 shall contain 5 compulsory short answer questions for a total of 5 marks such that each question carries 1mark.
- iii. In each part, questions from 2 to 4, there shall be either or type questions of 10 mark each. Student shall answer any one of them.
- iv. The questions from 2 to 4 shall be set by covering one unit of the syllabus for each question.

PRACTICAL COURSES

Assessment Method	Marks
Continuous Internal Assessment	30
Semester End Examination	70
Total	100

- b) For practical courses, there shall be a continuous evaluation during the semester for 30 sessional marks and end examination shall be for 70 marks.
- c) Day-to-day work in the laboratory shall be evaluated for 15 marks by the concerned laboratory teacher based on the regularity/record/viva and 15 marks for the internal test.
- d) The end examination shall be evaluated for 70 marks, conducted by the concerned laboratory teacher and a senior expert in the subject from the same department.

Procedure: 20 Marks

Experimental work & Results: 30 marks

Viva voce: 20 marks.

In a practical subject consisting of two parts (Eg: Basic Electrical &Electronics Engineering Lab), the end examination shall be conducted for 70 marks as a single laboratory in 3 hours.

e) Engineering Graphics evaluation

Assessment Method	Marks
Continuous Internal Assessment	30
Semester End Examination	70
Total	100

Day-to-day work shall be evaluated for 15 marks by the concerned subject teacher based on the reports/submissions prepared in the class and 15 marks for the internal examination.

The internal examination pattern for Engineering Graphics, shall consist of 5 questions, either or type, of equal weightage of 3 marks.

The end examination shall be evaluated for 70 marks, conducted by the concerned teacher and a senior expert in the subject from the same department.

The end examination pattern for Engineering Graphics, shall consists of 5 questions, either or type, of 10 marks each (5x10=50) and 20 marks for Viva voce.

f) NSS/NCC/SCOUTS & GUIDES/COMMUNITY SERVICE

General Guidelines:

- 1. Assign slots in the Timetable for the activities.
- 2. Provide instructor to mentor the students.

Evaluation Guidelines:

- Evaluated for a total of 100 marks.
- A student can select 6 activities of his/her choice with a minimum of 01 activity per unit. Each activity shall be evaluated by the concerned teacher for 15 marks, totaling to 90 marks.

• A student shall be evaluated by the concerned teacher for 10 marks by conducting viva voce on the subject.

HEALTH AND WELLNESS, YOGA AND SPORTS

General Guidelines:

- 1. Assign slots in the Timetable for the activities of Health/Sports/Yoga.
- 2. Provide field/facility and offer the minimum of five choices of as many as Games/Sports.
- 3. Provide sports instructor / yoga teacher to mentor the students.

Evaluation Guidelines:

- Evaluated for a total of 100 marks.
- A student can select 6 activities of his/her choice with a minimum of 01 activity per unit. Each activity shall be evaluated by the concerned teacher for 15 marks, totalling to 90 marks
- A student shall be evaluated by the concerned teacher for 10 marks by conducting viva voce on the subject.
- g) There shall be no external examination for mandatory courses with zero credits. However, attendance shall be considered while calculating aggregate attendance and student shall be declared to have passed the mandatory course only when he/she secures 40% or more in the internal examinations. In case, the students fails, a re-examination shall be conducted for failed candidates for 30 marks satisfying the conditions mentioned in item 1 & 2 of the regulations.
- h) The laboratory records and mid semester test papers shall be preserved for a minimum of 1 year in the respective departments and shall be produced to the Committees of the University as and when the same are asked for.

10. Skill oriented Courses

- i. There shall be five skill-oriented courses offered during III to VII semesters.
- ii. Out of the five skill courses two shall be skill-oriented courses from the same domain. Of the remaining three skill courses, one shall be a soft skill course and the remaining two shall be skill-advanced courses from the same domain/Interdisciplinary/Job oriented.
- iii. The course shall carry 100 marks and shall be evaluated through continuous assessments during the semester for 30 sessional marks and end examination shall be for 70 marks. Day-to-day work in the class / laboratory shall be evaluated for 30 marks by the concerned teacher based on the regularity/assignments/viva/mid semester test. The end examination similar to practical examination pattern shall be conducted by the concerned teacher and an expert in the subject nominated by the principal.
- iv. The Head of the Department shall identify a faculty member as coordinator for the course. A committee consisting of the Head of the Department, coordinator and a senior Faculty member nominated by the Head of the Department shall monitor the evaluation process. The marks/grades shall be assigned to the students by the above committee based on their performance.
- v. The student shall be given an option to choose either the skill courses being offered by the college or to choose a certificate course being offered by industries / Professional bodies or any other accredited bodies. If a student chooses to take a Certificate Course offered by external agencies, the credits shall be awarded to the student upon producing the Course Completion Certificate from the agency. A committee shall be formed at the level of the college to evaluate the grades/marks given for a course by external agencies and convert to the equivalent marks/grades.
- vi. If a student prefers to take a certificate course offered by external agency and approved by University, the department shall mark attendance of the student for the remaining courses in that semester excluding the skill course in all the calculations of mandatory attendance requirements upon producing a valid certificate as approved by the University.

11. Massive Open Online Courses (MOOCs):

A Student has to pursue and complete one course compulsorily through MOOCs approved by the BoS. A student can pursue courses other than core through MOOCs and it is mandatory to complete one course successfully through MOOCs for awarding the degree. A student is not permitted to register and pursue core courses through MOOCs.

A student shall register for the course (Minimum of either 8 weeks or 12 weeks) offered through MOOCs with the approval of Head of the Department. The Head of the Department shall appoint one mentor to monitor the students progression. The student needs to earn a certificate by passing the exam. The student shall be awarded the credits assigned in the curriculum only by submission of the certificate. Examination fee, if any, will be borne by the student.

Students who have qualified in the proctored examinations conducted through MOOCs platform can apply for credit transfer as specified and are exempted from appearing internal as well as external examination (for the specified equivalent credit course only) conducted by the university.

Necessary amendments in rules and regulations regarding adoption of MOOC courses would be proposed from time to time.

12. Credit Transfer Policy

Adoption of MOOCs is mandatory, to enable Blended model of teaching-learning as also envisaged in the NEP 2020. As per University Grants Commission (Credit Framework for Online Learning Courses through SWAYAM) Regulation, 2016, the University shall allow up to a maximum of 20% of the total courses being offered in a particular programme i.e., maximum of 32 credits through MOOCs platform.

- i. The University shall offer credit mobility for MOOCs and give the equivalent credit weightage to the students for the credits earned through online learning courses.
- ii. Student registration for the MOOCs shall be only through the respective department of the institution, it is mandatory for the student to share necessary information with the department.
- iii. Credit transfer policy will be applicable to the Professional & Open Elective courses only.
- iv. The concerned department shall identify the courses permitted for credit transfer.
- v. The University/institution shall notify at the beginning of semester the list of the online learning courses eligible for credit transfer.
- vi. The institution shall designate a faculty member as a Mentor for each course to guide the students from registration till completion of the credit course.
- vii. The university shall ensure no overlap of MOOC exams with that of the university examination schedule. In case of delay in results, the university will re-issue the marks sheet for such students.
- viii. Student pursuing courses under MOOCs shall acquire the required credits only after successful completion of the course and submitting a certificate issued by the competent authority along with the percentage of marks and grades.
- ix. The universities shall resolve any issues that may arise in the implementation of this policy from time to time and shall review its credit transfer policy in the light of periodic changes brought by UGC, SWAYAM, NPTEL and state government.

Note: Students shall be permitted to register for MOOCs offered through online platforms approved by the University from time to time.

13. Academic Bank of Credits (ABC)

The University has implemented Academic Bank of Credits (ABC) to promote flexibility in curriculum as per NEP 2020 to

i. Provide option of mobility for learners across the universities of their choice

- ii. Provide option to gain the credits through MOOCs from approved digital platforms.
- iii. Facilitate award of certificate/diploma/degree in line with the accumulated credits in ABC
- iv. Execute Multiple Entry and Exit system with credit count, credit transfer and credit acceptance from students" account.

14. Internships Summer Internships

Two summer internships either onsite or virtual each with a minimum of 08 weeks duration, done at the end of second and third years, respectively. It shall be completed in collaboration with local industries, Govt. Organizations, construction agencies, Power projects, software MNCs or any industries in the areas of concerned specialization of the Undergraduate program. One of the two summer internships at the end of second year (Community Service Project) shall be society oriented and shall be completed in collaboration with government organizations/NGOs & others. The other internship at the end of third year is Industry Internship and shall be completed in collaboration with Industries. The student shall register for the internship as per course structure after commencement of academic year. The guidelines issued by the APSCHE / University shall be followed for carrying out and evaluation of Community Service Project and Industry Internship.

Evaluation of the summer internships shall be through the departmental committee. A student will be required to submit a summer internship report to the concerned department and appear for an oral presentation before the departmental committee comprising of Head of the Department, supervisor of the internship and a senior faculty member of the department. A certificate of successful completion from industry shall be included in the report. The report and the oral presentation shall carry 50% weightage each. It shall be evaluated for 50 external marks. There shall be no internal marks for Summer Internship. A student shall secure minimum 40% of marks for successful completion. In case, if a student fails, he/she shall reappear as and when semester supplementary examinations are conducted by the University.

Full Semester Internship and Project work:

In the final semester, the student should register and undergo internship (onsite/virtual) and in parallel he/she should work on a project with well-defined objectives. At the end of the semester the candidate shall submit an internship completion certificate and a project report. A student shall also be permitted to submit project report on the work carried out during the internship.

The project report shall be evaluated with an external examiner. The total marks for project work 200 marks and distribution shall be 60 marks for internal and 140 marks for external evaluation. The supervisor assesses the student for 30 marks (Report: 15 marks, Seminar: 15 marks). At the end of the semester, all projects shall be showcased at the department for the benefit of all students and staff and the same is to be evaluated by the departmental Project Review Committee consisting of supervisor, a senior faculty and HOD for 30 marks. The external evaluation of Project Work is a Viva-Voce Examination conducted in the presence of internal examiner and external examiner and is evaluated for 140 marks.

The college shall facilitate and monitor the student internship programs. Completion of internships is mandatory, if any student fails to complete internship, he/she will not be eligible for the award of degree. In such cases, the student shall repeat and complete the internship.

15. Guidelines for offering a Minor

To promote interdisciplinary knowledge among the students, the students admitted into B.Tech. in a major stream/branch are eligible to obtain degree in Minor in another stream.

- i. The Minor program requires the completion of 12 credits in Minor stream chosen.
- ii. Two courses for 06 credits related to a Minor are to be pursued compulsorily for the minor degree, but maybe waived for students who have done similar/equivalent courses. If waived for a student, then the student must take an extra elective course in its place. It is recommended that students should complete the compulsory courses (or equivalents) before registering for the electives.

iii. Electives (minimum of 2 courses) to complete a total of 12 credits.

Note: A total of 04 Open Electives are offered in the curriculum. A student can complete the requirement for Minor within the 160 credits by opting for the courses offered through various verticals/tracks under Open Electives.

16. Guidelines for offering Honors

The objective of introducing B.Tech. (Hons.) is to facilitate the students to choose additionally the specialized courses of their choice and build their competence in a specialized area in the UG level. The programme is a best choice for academically excellent students having good academic record and interest towards higher studies and research.

- i. Honors is introduced in the curriculum of all B. Tech. programs offering a major degree and is applicable to all B. Tech (Regular and Lateral Entry) students admitted in Engineering & Technology.
- ii. A student shall earn additional 15 credits for award of B.Tech.(Honors) degree from same branch/department/discipline registered for major degree. This is in addition to the credits essential for obtaining the Undergraduate degree in Major Discipline (i.e., 160 credits).
- iii. A student is permitted to register for Honors in IV semester after the results of III Semester are declared and students may be allowed to take maximum two subjects per semester pertaining to the Honors from V Semester onwards.
- iv. The concerned Principal of the college shall arrange separate class work and timetable of the courses offered under Honors program.
- v. Courses that are used to fulfill the student's primary major may not be double counted towards the Honors. Courses with content substantially equivalent to courses in the student's primary Major may not be counted towards the Honors.
- vi. Students can complete the courses offered under Honors either in the college or in online platforms like SWAYAM with a minimum duration of 12 weeks for a 3-credit course and 8 weeks duration for a 2-credit course satisfying the criteria for credit mobility. If the courses under Honors are offered in conventional mode, then the teaching and evaluation procedure shall be similar to regular B. Tech courses.
- vii. The attendance for the registered courses under Honors and regular courses offered for Major degree in a semester are to be considered separately.
- viii. A student shall maintain an attendance of 75% in all registered courses under Honors to be eligible for attending semester end examinations.
- ix. A student registered for Honors shall pass in all subjects that constitute the requirement for the Honors degree program. No class/division (i.e., second class, first class and distinction, etc.) shall be awarded for Honors degree programme.
- x. If a student drops or is terminated from the Honors program, the additional credits so far earned cannot be converted into open or core electives; they will remain extra. However, such students will receive a separate grade sheet mentioning the additional courses completed by them.
- xi. The Honors will be mentioned in the degree certificate as Bachelor of Technology (Honors) in XYZ. For example, B.Tech. (Honors) in Mechanical Engineering

Enrolment into Honors:

- i. Students of a Department/Discipline are eligible to opt for Honors program offered by the same Department/Discipline.
- ii. The enrolment of student into Honors is based on the CGPA obtained in the major degree program. CGPA shall be taken up to III semester in case of regular entry students and only III semester in case of lateral entry students. Students having 7 CGPA without any backlog subjects will be permitted to register for Honors.
- iii. If a student is detained due to lack of attendance either in Major or in Honors, registration shall be cancelled.
- iv. Transfer of credits from Honors to regular B. Tech degree and vice-versa shall not be permitted.
- v. Honors is to be completed simultaneously with a Major degree program.

Registration for Honors:

- i. The eligible and interested students shall apply through the HOD of his/her parent department. The whole process should be completed within one week before the start of every semester. Selected students shall be permitted to register the courses under Honors.
- ii. The selected students shall submit their willingness to the principal through his/her parent department offering Honors. The parent department shall maintain the record of student pursuing the Honors.
- iii. The students enrolled in the Honors courses will be monitored continuously. An advisor/mentor from parent department shall be assigned to a group of students to monitor the progress.
- iv. There is no fee for registration of subjects for Honors program offered in offline at the respective institutions.

17. Attendance Requirements:

- i. A student shall be eligible to appear for the external examinations if he/she acquires a minimum 75% of attendance in aggregate of all the subjects.
- ii. Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in each semester may be granted.
- iii. Shortage of Attendance below 65% in aggregate shall in NO CASE be condoned.
- iv. Students whose shortage of attendance is not condoned in any semester are not eligible to take their end examination of that class and their registration shall stand cancelled.
- v. A student will not be promoted to the next semester unless he satisfies the attendance requirements of the present semester. They may seek readmission for that semester from the date of commencement of class work.
- vi. If the learning is carried out in blended mode (both offline & online), then the total attendance of the student shall be calculated considering the offline and online attendance of the student.
- vii. For induction programme attendance shall be maintained as per AICTE norms.

18. Promotion Rules:

The following academic requirements must be satisfied in addition to the attendance requirements.

- i. A student shall be promoted from first year to second year if he/she fulfills the minimum attendance requirement as per university norms.
- ii. A student will be promoted from II to III year if he/she fulfills the academic requirement of securing 40% of the credits (any decimal fraction should be rounded off to lower digit) up to in the subjects that have been studied up to III semester.
- iii. A student shall be promoted from III year to IV year if he/she fulfills the academic requirements of securing 40% of the credits (any decimal fraction should be rounded off to lower digit) in the subjects that have been studied up to V semester.

 And in case a student is detained for want of credits for a particular academic year by ii) & iii) above, the student may make up the credits through supplementary examinations and only after securing the required credits he/she shall be permitted to join in the V
- iv. When a student is detained due to lack of credits/shortage of attendance he/she may be readmitted when the semester is offered after fulfillment of academic regulations. In such case, he/she shall be in the academic regulations into which he/she is readmitted.

semester or VII semester respectively as the case may be.

19. Grading:

As a measure of the student's performance, a 10-point Absolute Grading System using the following Letter Grades and corresponding percentage of marks shall be followed:

After each course is evaluated for 100 marks, the marks obtained in each course will be converted to a corresponding letter grade as given below, depending on the range in which the marks obtained by the student fall.

Structure of Grading of Academic Performance

Range in which the marks in the subject fall	Grade	Grade points Assigned
90 & above	S (Superior)	10
80 - 89	A (Excellent)	9
70 - 79	B (Very Good)	8
60 - 69	C (Good)	7
50 - 59	D (Average)	6
40 - 49	E (Pass)	5
< 40	F (Fail)	0
Absent	Ab (Absent)	0

- i. A student obtaining Grade "F" or Grade "Ab" in a subject shall be considered failed and will be required to reappear for that subject when it is offered the next supplementary examination.
- ii. For non-credit audit courses, "Satisfactory" or "Unsatisfactory" shall be indicated instead of the letter grade and this will not be counted for the computation of SGPA/CGPA/Percentage.

Computation of Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

The Semester Grade Point Average (SGPA) is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e.,

SGPA =
$$\Sigma$$
 (Ci × Gi)/ Σ Ci

where, Ci is the number of credits of the ith subject and Gi is the grade point scored by the student in the ith course.

The Cumulative Grade Point Average (CGPA) will be computed in the same manner considering all the courses undergone by a student over all the semesters of a program, i.e.,

$$CGPA = \Sigma (Ci \times Si) / \Sigma Ci$$

where "Si" is the SGPA of the ith semester and Ci is the total number of credits up to that semester.

Both SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

While computing the SGPA the subjects in which the student is awarded Zero grade points will also be included.

Grade Point: It is a numerical weight allotted to each letter grade on a 10-point scale. Letter Grade: It is an index of the performance of students in a said course. Grades are denoted by the letters S, A, B, C, D and F.

Award of Class:

After a student has satisfied the requirements prescribed for the completion of the program and is eligible for the award of B. Tech. Degree, he/she shall be placed in one of the following four classes:

Class Awarded	CGPA Secured
First Class with Distinction	≥ 7.5 (Without any supplementary appearance)
First Class	≥ 6.5 < 7.5

Second Class	≥ 5.5 < 6.5
Pass Class	$\geq 5.0 < 5.5$

Note: * Students who have written supplementary examinations to fulfil the credit requirement will not be awarded First Class with Distinction. For such students the highest degree that is awarded will be First Class Only.

CGPA to Percentage conversion Formula = $(CGPA - 0.5) \times 10$

20. With-holding of Results

If the candidate has any dues not paid to the university or if any case of indiscipline or malpractice is pending against him/her, the result of the candidate shall be withheld in such cases.

21. Multiple Entry / Exit Option

(a) Exit Policy:

The students can choose to exit the four-year programme at the end of first/second/third year.

- i) **UG Certificate in (Field of study/discipline)** Programme duration: First year (first two semesters) of the undergraduate programme, 40 credits followed by an additional exit 10-credit bridge course(s) lasting two months, including at least 6- credit job-specific internship/apprenticeship that would help the candidates acquire job-ready competencies required to enter the workforce.
- ii) **UG Diploma** (in Field of study/discipline) Programme duration: First two years (first four semesters) of the undergraduate programme, 80 credits followed by an additional exit 10-credit bridge course(s) lasting two months, including at least 6- credit job-specific internship/apprenticeship that would help the candidates acquire job-ready competencies required to enter the workforce.
- iii) Bachelor of Science (in Field of study/discipline) i.e., B.Sc. Engineering in (Field of study/discipline)- Programme duration: First three years (first six semesters) of the undergraduate programme, 120 credits.

(b) Entry Policy:

Modalities on multiple entry by the student into the B.Tech. programme will be provided in due course of time.

Note: The Universities shall resolve any issues that may arise in the implementation of Multiple Entry and Exit policies from time to time and shall review the policies in the light of periodic changes brought by UGC, AICTE and State government.

22. Gap Year Concept:

Gap year concept for Student Entrepreneur in Residence is introduced and outstanding students who wish to pursue entrepreneurship / become entrepreneur are allowed to take a break of one year at any time after II year to pursue full-time entrepreneurship programme/to establish startups. This period may be extended to two years at the most and these two years would not be counted for the time for the maximum time for graduation. The principal of the respective college shall forward such proposals submitted by the students to the University. An evaluation committee constituted by the University shall evaluate the proposal submitted by the student and the committee shall decide whether to permit the student(s) to avail the Gap Year or not

23. Transitory Regulations

Discontinued, detained or failed candidates are eligible for readmission as and when the semester is offered after fulfillment of academic regulations. Candidates who have been detained for want of attendance or not fulfilled academic requirements or who have failed after having undergone the course in earlier regulations or have discontinued and wish to continue the course are eligible for admission into the unfinished semester from the date of commencement of class work with the same or equivalent subjects as and when subjects are offered, subject to Section 2 and they will follow the academic regulations into which they are readmitted.

Candidates who are permitted to avail Gap Year shall be eligible for re-joining into the succeeding year of their B.Tech from the date of commencement of class work, subject to Section 2 and they will follow the academic regulations into which they are readmitted.

24. Minimum Instruction Days for a Semester:

The minimum instruction days including exams for each semester shall be 90 days.

25. Medium of Instruction:

The medium of instruction of the entire B.Tech undergraduate programme in Engineering &Technology (including examinations and project reports) will be in English only.

26. Student Transfers:

Student transfers shall be as per the guidelines issued by the Government of Andhra Pradesh and the Universities from time to time.

27. General Instructions:

- a. The academic regulations should be read as a whole for purpose of any interpretation.
- b. Malpractices rules-nature and punishments are appended.
- c. Where the words "he", "him", "his", occur in the regulations, they also include "she", "her", "hers", respectively.
- d. In the case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Vice-Chancellor is final.
- e. The Universities may change or amend the academic regulations or syllabi at any time and the changes or amendments shall be made applicable to all the students on rolls with effect from the dates notified by the Universities.
- f. In the case of any doubt or ambiguity in the interpretation of the guidelines given, the decision of the Vice-Chancellor / Head of the institution is final.

Regulations for MALPRACTICES during the conduct of examinations

	Nature of Malpractices/Improper conduct	Punishment
1.a	If the candidate possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination) - FIRST TIME (whether copied or not)	 Expulsion from the examination hall and cancellation of the performance in that subject only. To keep the CC footage of the act as an evidence. To obtain a statement from student and get it authorized by observer and Chief superintendent.
1.b	If the candidate possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination) - SECOND TIME(whether copied or not)	 Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations, project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year. To keep the CC footage of the act as an evidence. To obtain a statement from student and get it authorized by observer and Chief superintendent.
1.c	If the candidate possesses or keeps accessible in	Nature of punishment to be given for the improper

2.a.	examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination) - REPITITION OF THE ABOVE ACT (After second time and whether copied or not) If the candidate gives assistance or guidance or receives it from any other candidate orally or by any other body language methods.	 conduct shall be as per the recommendations of the committee. The committee comprising of Principal, Vice principal, Chief superintendent, Controller of Examinations and HoD to discuss and initiate the action to be taken and recommend. To keep the CC footage of the act as evidence. To obtain a statement from student and invigilator and authorized by Chief superintendent. Expulsion from the examination hall and cancellation of the performance in that subject only of all the candidates involved. To keep the CC footage of the act as an
2.b	If the candidate communicates through cell phones / through any other means with any candidate or persons in or outside the exam hall in respect of any	evidence.
	matter. (i) If the communication is with the person(s) who belongs to our college.	Confiscation of the mobile or electronic gadgets involved and Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations, project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year.
		 To obtain all relevant proofs of evidence from the Mobile/ gadgets and handing over of the same to the candidate. To keep the CC footage of the act as evidence. To obtain a statement from student and invigilator and authorized by observer and Chief superintendent.
	(ii) If the communication is with the person(s) outside the campus or people who are not related to our college.	Confiscation of the mobile or electronic gadgets involved and Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations, project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year.
		 To obtain all relevant proofs of evidence from the Mobile/ gadgets and handing over of the same to the candidate. To keep the CC footage of the act as evidence. To obtain a statement from student and invigilator and authorized by observer and Chief superintendent. The person(s) involved should be handed over to the police and a case is registered against him.
3.	If the candidate impersonates any other candidate in connection with the examination.	The candidate who has impersonated shall be expelled from examination hall. The candidate is also debarred and forfeits the seat. The performance of the original candidate, who has

been impersonated, shall be cancelled in all the subjects of the examination (including practical's and project work) already appeared and shall not be allowed to appear for examinations of the remaining subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. If the imposter is an outsider/candidate not on rolls, he will be handed over to the police and a case is registered against him. To constitute a committee comprising of Principal, Chief Vice principal, superintendent, Observer, Controller Examinations and HoD to discuss and initiate the above action with documented proofs. To keep the CC footage of the act as an evidence. To obtain a statement from student. invigilator, subject expert and authorized by observer and Chief superintendent. examination If the candidate mishandles the Answer book or Expulsion from the hall and additional sheet or takes out or arranges to send out cancellation of performance in that subject and all the other subjects the candidate has already the question paper during the examination or appeared including practical examinations and answer book or additional sheet, during or after the project work and shall not be permitted for the remaining examinations of the subjects of that Also, if the answer script is mutilated / damaged semester. disturbing the shape, of the script, answers, the bar code intentionally. In addition to the above punishment, a committee shall be constituted and recommends appropriate punishment for the improper conduct. To keep the CC footage of the act as an evidence. To Obtain a statement from student and invigilator and authorized by observer and Chief superintendent. Uses objectionable, abusive or offensive language in Expulsion from the examination hall 5. cancellation of the performance in that subject only. the Examination hall. • To Obtain a statement from student and invigilator and get it authorized by Observer and Chief superintendent. 6. Refuses to obey the orders of the Chief In case of students of the college, they shall be Superintendent/ACE/ any officer on expelled from examination halls and cancellation of duty or misbehaves or creates disturbance of any kind in and their performance in that subject and all other around the examination hall or organizes a walk out or subjects the candidate(s) has (have) already instigates others to walk out, or threatens the officerappeared and shall not be permitted to appear for the remaining examinations of the subjects of that in charge or any person on duty in or outside the examination hall of any injury to his person or to any semester. The candidates also are debarred and of his relations whether by words, either spoken or forfeit their seats. In case of outsiders, they will be written or by signs or by visible representation, handed over to the police and a police case is assaults the officer-in-charge, or any person on duty in registered against them. or outside the examination hall or any of his relations, To constitute a committee comprising of or indulges in any other act of misconduct or mischief Principal, Vice principal, Chief superintendent, which result in damage to or destruction of property in Observer, Controller of Examinations and HoD the examination hall or any part of the College to discuss and initiate the above action with campus or engages in any other act which in the

documented proofs

	opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct of the examination.	 To keep the CC footage of the act as an evidence. To Obtain a statement from student and invigilator and authorized by observer and Chief superintendent.
7.	Leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
		 To constitute a committee comprising of Principal, Vice principal, Chief superintendent, Observer, Controller of Examinations and HoD to discuss and initiate the above action. To keep the CC footage of the act as an evidence. To Obtain a statement from student and invigilator and authorized by observer and Chief superintendent.
8.	Possess any lethal weapon or firearm in the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat.
		 To constitute a committee comprising of Principal, Vice principal, Chief superintendent, Observer, Controller of Examinations and HoD to discuss and initiate the above action with documented proofs To keep the CC footage of the act as an evidence. To obtain a statement from student and
		 invigilator and authorized by observer and Chief superintendent. The candidate shall be handed over to Police and register a case.
9.	If a student of the college, who is not a candidate for the particular examination or any person not connected with the college indulges in any malpractice or improper conduct mentioned in clause 6 to 8.	If the student belongs to our college: Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester. The candidate is also debarred and forfeits the seat. Person(s) who do not belong to the College will be handed over to police and, a police case will be registered against them. • To constitute a committee comprising of Principal, Vice principal, Chief superintendent, Observer, Controller of Examinations and HoD to discuss and initiate the above action.

		 To keep the CC footage of the act as an evidence. To Obtain a statement from student and invigilator and authorized by observer and Chief superintendent.
10	Comes in a drunken condition to the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester. • To keep the CC footage of the act as an evidence(If any). • To obtain a statement from invigilator and any others as witness authorized by observer and Chief superintendent.
11	Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.	Cancellation of the performance in that subject and all other subjects the candidate has appeared including practical examinations and project work of that semester/year examinations. • To Obtain a statement from Valuer / Chief Valuer authorized by Spot Coordinator and Controller of Examinations.

General:

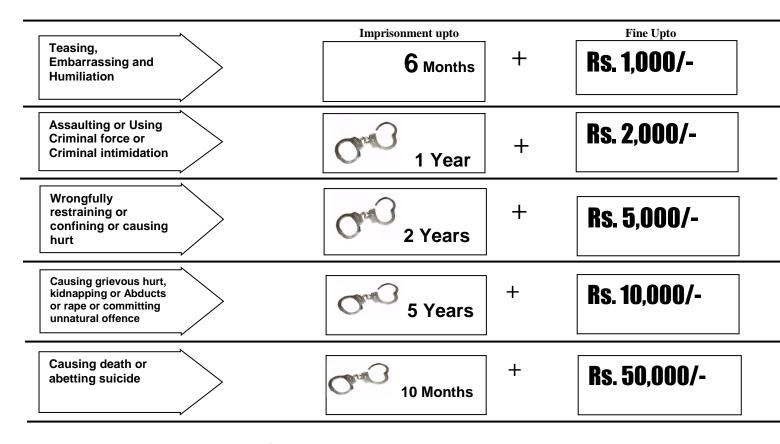

- Wherever the words "he", "him", "his", occur in the regulations, they include "she", "her", "here"
- The academic regulation should be read as a whole for the purpose of any interpretation.
- In the case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Vice-Chancellor is final.
- The University may change or amend the academic regulations or syllabi at any time and the changes or amendments made shall be applicable to all the students with effect from the dates notified by the University.

Salient Features

Ragging within or outside any educational institution is prohibited.

ging means doing an act which causes or is likely to cause Insult or Annoyance of Fear or Apprehension or Threat or Intimidation or outrage of modesty or Injury to a student

In Case of Emergency CALL TOLL FREE NO.: 1800 - 425 - 1288

Ragging Free Campus Ragging ABSOLUTELY NO TO RAGGING

- 1. Ragging is prohibited as per Act 26 of A.P. Legislative Assembly, 1997.
- 2. Ragging entails heavy fines and/or imprisonment.
- 3. Ragging invokes suspension and dismissal from the College.
- 4. Outsiders are prohibited from entering the College and Hostel without permission.
- 5. Girl students must be in their hostel rooms by 7.00 p.m.
- 6. All the students must carry their Identity Cards and show them when demanded
- 7. The Principal and the Wardens may visit the Hostels and inspect the rooms any time.

ACADEMIC REGULATIONS (R23) FOR B.TECH. (LATERAL ENTRY SCHEME)

(Effective for the students getting admitted into II year through Lateral Entry Scheme from the Academic Year 2024-2025 onwards)

1. Award of the Degree

- (a) Award of the B.Tech. Degree / B.Tech. Degree with a Minor if he/she fulfils th following:
 - (i) Pursues a course of study for not less than three academic years and not more than six academic years. However, for the students availing Gap year facility this period shall be extended by two years at the most and these two years would in addition to the maximum period permitted for graduation (Six years).
 - (ii) Registers for 120 credits and secures all 120 credits.

(b) Award of B.Tech. degree with Honors

A student will be declared eligible for the award of the B.Tech. with Honors if he/she fulfils the following:

- (i) Student secures additional 15 credits fulfilling all the requisites of a B.Tech. program i.e., 120 credits. (ii) Registering for Honors is optional.
- (iii) Honors is to be completed simultaneously with B.Tech. programme.
- 2. Students, who fail to fulfil the requirement for the award of the degree within <u>six</u> consecutive academic years from the year of admission, shall forfeit their seat.

3. Minimum Academic Requirements

The following academic requirements have to be satisfied in addition to the requirements mentioned in item no.2

- i. A student shall be deemed to have satisfied the minimum academic requirements and earned the credits allotted to each theory, practical, design, drawing subject or project if he secures not less than 35% of marks in the end examination and a minimum of 40% of marks in the sum total of the mid semester evaluation and end examination taken together.
- ii. A student shall be promoted from III year to IV year if he/she fulfils the academic requirements of securing 40% of the credits (any decimal fraction should be rounded off to lower digit) in the subjects that have been studied up to V semester.

And in case if student is already detained for want of credits for particular academic year, the student may make up the credits through supplementary exams of the above exams before the commencement of IV year I semester class work of next year.

4. Course Pattern

- i) The entire course of study is three academic years on semester pattern.
- ii) A student eligible to appear for the end examination in a subject but absent at it or has failed in the end examination may appear for that subject at the next supplementary examination offered.
- iii) When a student is detained due to lack of credits/shortage of attendance the student may be re-admitted when the semester is offered after fulfilment of academic regulations, the student shall be in the academic regulations into which he/she is readmitted.
- **5.** All other regulations as applicable for B. Tech. Four-year degree course (Regular) will hold good for B. Tech. (Lateral Entry Scheme).

COURSE STRUCTURE - R23 REGULATIONS

B. Tech. (Regular / Honors) – COMPUTER SCIENCE AND ENGINEERING (ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING)

PROFESSIONAL ELECTIVES

❖ Students will be able to choose from multiple threads at the beginning of Semester V for generic CSE, IT and CSIT streams.

	AI & ML (Thread – I)					
S.No.	Professional Elective	Course Title	Credits			
1	PE – I	Data Ware Housing & Data Mining	2			
2	PE – II	Statistical Regression & Time Series Data Analysis	3			
3	PE – III	Artificial Intelligence: Principles & Techniques	2			
4	PE – IV	Machine Learning Algorithms & Techniques	3			
5	PE – V	Reinforced & Deep Learning	3			

Open Electives Offered by CSE, IT & Allied Branches to Other Departments

S. No.	Course Title
1	Fundamentals of Data Structures
2	Basics of Operating Systems
3	Basics of Computer Networks
4	Object Oriented Programming with java
5	Basics of Database Management Systems
6	Web Design and Development

Open Electives Offered by Other Departments

Mechanical Engineering Department

S. No.	Course Title
1	Introduction to Operations Research
2	Fundamentals of Supply Chain Management
3	Fundamentals of Product Lifecycle Management
4	Corporate Leadership & Change Management
5	Solar and Wind Energy
6	Introduction to Robotics

EEE Department

S. No.	Course Title
1	Electrical Vehicles
2	Embedded Systems
3	Renewable Energy Sources & Integration
4	Electrical Wiring, Estimation and
	Costing
5	MATLAB Programming & Simulink
6	Soft Computing Techniques

ECE Department

S. No	Course Title
1	Principles of Mobile Communications
2	Basics of VLSI Design
3	Sensors and Transducers
4	Drone Technology
5	Embedded Systems
6	Basics of Signal Processing

Chemical Engineering Department

S. No	Course Title
1	Environment Impact Assessment
2	Non-Conventional Sources of Energy
3	Waste to Energy Conversion
4	Industrial Safety & Hazards Management
5	Industrial Pollution and Control
	Engineering
6	Greenfuel Technologies

Civil Engineering Department

S. No.	Course Title
1	Road Safety Engineering
2	Remote Sensing and Geoinformatics
3	Intelligent Transportation Systems
4	Project Planning and Management
5	Sustainable Materials and Green Buildings
6	Engineering for Sustainable Development

MBA Department

S. No.	Course Title
1	Macro Economics
2	Securities and Financial Instruments
3	Internet Marketing

- ❖ Open Electives I and II can be chosen from other departments.
- ❖ Open Electives III and IV can be done in MOOC and can be either inter or intra disciplinary. If not MOOC, the default option would be Open Elective − III and IV. Course cannot be chosen if it is already done by the student.

	Open Elective – III						
S.No.	S.No. Course Title						
1	Statistical Regression &Time Series Data Analysis						
2	Cryptography and Information Security						
3	Statistical & Mathematical Foundations of Data Analytics						
4	Open Databases & R Programming						

	Open Elective – IV					
S.No.	S.No. Course Title					
1	Semantic and Sentiment Analysis					
2	Network Security & Cyber Forensic Laws					
3	Multivariate and Stochastic Analytics with R					
4	Data Visualization & Reporting Tools					
5	Block Chain Technology & Applications					

LIST OF HONORS COURSES

$\boldsymbol{\diamondsuit}$ Course cannot be chosen if it is already done by the student.

S. No.	Course Title	Credits
	Semantic and Sentiment Analysis

	Pre-requisite	Higher Secondary School Physics	3	0	0	3

Course Objective

• To bridge the gap between the Physics in school at 10+2 level and UG level engineering courses by identifying the importance of the optical phenomenon like interference, diffraction etc. Enlightening the periodic arrangement of atoms in crystalline solids and concepts of quantum mechanics, introduce novel concepts of dielectric and magnetic materials, physics of semiconductors.

Course Outcomes

- Student will be able to **analyze** the intensity variation of light due to interference, diffraction and polarization
- 2 Student will be able to **investigate** the crystallographic phase of the unknown specimen by using the X-ray diffraction method
- 3 Student will be able to **interpret** the various polarization mechanisms and their frequency dependence in dielectrics; and **choose** a magnetic material for a given application based on the domain model.
- 4 Student will be able to **deduce** the quantized facets for a free electron in a potential box, and extend the same to **explain** the electrical conductivity and Fermi energy of metals.
- 5 Student will be able to **classify** the solids, **analyze** the semiconductor charge carrier concentrations, and **identify** the semiconductor type by using the Hall effect.
- Student will be able to **elaborate** the optical phenomena, crystallographic phase, magneto-dielectric physiognomies, quantum confinement effects, and the rudiments of semiconductor band model.

SYLLABUS

Unit I WAVE OPTICS 9 hr

Interference: Introduction - Principle of superposition —Interference of light - Interference in thin films (Reflection Geometry) & applications - Colors in thin films- Newton's Rings-Determination of wavelength and refractive index. Diffraction: Introduction - Fresnel and Fraunhofer diffractions - Fraunhofer diffraction due to single slit, double slit & N-slits (Qualitative) — Diffraction Grating - Dispersive power and resolving power of Grating (Qualitative). Polarization: Introduction -Types of polarization - Polarization by reflection, refraction and Double refraction - Nicol's Prism -Half wave and Quarter wave plates.

Unit II CRYSTALLOGRAPHY AND X-RAY DIFFRACTION

Crystallography: Space lattice, Basis, Unit Cell and lattice parameters – Bravais Lattices – crystal systems (3D) – coordination number - packing fraction of SC, BCC & FCC - Miller indices – separation between successive (hkl) planes. **X-ray diffraction:** Bragg's law - X-ray Diffractometer – crystal structure determination by Laue's and powder methods.

Unit III DIELECTRIC AND MAGNETIC MATERIALS 9 hr

Dielectric Materials: Introduction - Dielectric polarization - Dielectric polarizability, Susceptibility, Dielectric constant and Displacement Vector –Relation between the electric vectors - Types of polarizations- Electronic (Quantitative), Ionic (Quantitative) and Orientation polarizations (Qualitative) - Lorentz internal field - Clausius- Mossotti equation - complex dilectric constant – Frequency dependence of polarization – dielectric loss. **Magnetic Materials:** Introduction - Magnetic dipole moment - Magnetization-Magnetic susceptibility and permeability – Atomic origin of magnetism - Classification of magnetic materials: Dia, para, Ferro, anti-ferro& Ferri magnetic materials - Domain concept for Ferromagnetism & Domain

walls (Qualitative) - Hysteresis - soft and hard magnetic materials.							
Unit IV QUANTUM MECHANICS AND FREE ELECTRON THEORY 9 hr							
Quantum Mechanics: Dual nature of matter – Heisenberg's Uncertainty Principle							
Significance and properties of wave function – Schrodinger's time independent and depende	ent						
wave equations— Particle in a one-dimensional infinite potential well. Free Electron							
Theory: Classical free electron theory (Qualitative with discussion of merits and demerits)							
Quantum free electron theory -electrical conductivity based on quantum free electron theory	7 -						
Fermi-Dirac distribution - Density of states - Fermi energy.							
Unit V SEMICONDUCTORS 9 hr							
Semiconductors: Formation of energy bands – classification of crystalline solids - Intrins							
semiconductors: Density of charge carriers – Electrical conductivity – Fermi level – Extrins							
semiconductors: density of charge carriers - dependence of Fermi energy on carr							
concentration and temperature - Drift and diffusion currents - Einstein's equation - Hall effe	ect						
and its applications.

Unit II	Them	ne: NATURE						6 hr
	Sample Text: Night of the Scorpion (poem) by Nissim Ezekiel							o III
		Supplementary Text: 'IF' by Rudyard Kipling						
		ning: Answering a series		ng to audio texts.				
		king: Discussion in pairs/s						
	1	ing: Identifying sequence		verbal techniques	that	help	to	
	link the ideas in a paragraph together.							
	Writing: Structure of a paragraph - Paragraph writing (specific topics) Grammar: Cohesive devices - linkers, use of articles and zero article prepositions.							
	Vocabulary: Homonyms, Homophones, Homographs.							
			<u> </u>					
Unit III	Lesso	on: BIOGRAPHY of Ste	ve Jobs					6 hr
	Supplementary Text: Biography of Tenzing Norgay							
	Listening: Listening for global comprehension and summarizing.							
	Speaking : Discussing specific topics in pairs or small groups and reporting what is							
	discussed.							
	Reading: Reading a text in detail by making basic inferences- recognizing and							
	interpreting specific context clues; strategies to use text clues for comprehension. Writing: Summarizing, Note-making, paraphrasing							
		nmar: Verbs - tenses; sub						
	Jiun	, , , , , , , , , , , , , , , , ,	jeer tore agreement				1	
	Voca	bulary: Compound words	s, Collocations					
	Voca	bulary: Compound words	s, Collocations					

Supplementary Text: The Man Who Planted Trees by Jean Giono

Listening: Making predictions while listening to conversations/ transactional

dialogues without video; listening with video.

Speaking: Role plays for the practice of conversational English in academic contexts (formal and informal) - asking for and giving information/directions.

Reading: Studying the use of graphic elements in texts to convey information, reveal trends/patterns/relationships, communicate processes or display complicated data.

Writing: Letter Writing: Official Letters, Resumes.

Grammar: Reporting verbs, Direct & Indirect speech, Active & Passive Voice.

Vocabulary: Words often confused, Jargon.

Unit V Lesson: MOTIVATION: The Power of Intrapersonal Communication (An Essay)

6 hr

Listening: Identifying key terms, understanding concepts and answering a series of relevant questions that test comprehension.

Speaking: Formal oral presentations **Reading**: Reading comprehension.

Writing: Writing structured essays on specific topics.

Grammar: Editing short texts –identifying and correcting common errors in grammar

(articles, prepositions, tenses, subject-verb agreement)

Vocabulary: Technical Jargon.

R23CMET201	(Common to All branches of Engineering)					
	Total Contact Hours	48 (L)	L	T	P	C
	Pre-requisite	Nil	3	0	0	3

Course Objectives

- Get familiarized with the scope and importance of Civil and Mechanical Engineering in different sectors and industries.
- Introduce the preliminary concepts of Building Planning, Building Construction, Materials and the related tests.
- Provide preliminary knowledge of surveying and understand the importance of transportation and the water resources in terms of quantity and quality.
- Explain different engineering materials and manufacturing processes.
- Provide an overview of different thermal and mechanical systems; introduce basics of robotics and its applications.

Course Outcomes

- Compile the role of a Civil Engineer in his multifaceted tasks and Discuss the principles of building planning and various construction aspects including materials
- 2 Solve for areas of irregular boundaries by means of lengths and bearings and for reduced level of an object
- Blaborate the importance of Transportation in Nation's economy and the engineering measures related to highways in terms of geometrics and water resources and storage structures to appreciate the social responsibility of water conservation in terms of quality and quantity.
- 4 Adapt and integrate the mechanical engineering technologies in various Industrial sectors, and choose appropriate engineering materials for engineering applications.
- 5 Express the working of different manufacturing processes, refrigeration and airconditioning cycles, IC engines, electric and hybrid vehicles.
- 6 Express and write the working of power plants, mechanical power transmission systems, and different robotic configurations.

SYLLABUS

PART A: BASIC CIVIL ENGINEERING

Unit I BASICS OF CIVIL ENGINEERING

8 hr

Basics of Civil Engineering: Role of Civil Engineers in Society- Various Disciplines of Civil Engineering- Structural Engineering- Geo-Technical Engineering- Transportation Engineering - Hydraulics and Water Resources Engineering - Environmental Engineering- Scope of each discipline - Building Construction and Planning- Construction Materials-Cement - Aggregate - Bricks- Cement concrete- Steel-Tests on these materials.

Factors to be considered in Building Planning- Nature of Buildings- Typical Layouts of a Residential Building- Industrial Building- Commercial Building like a Supermarket / Hotel / Theatre.

Unit II SURVEYING 8 hr

Surveying: Objectives of Surveying- Horizontal Measurements- Vertical Measurements- Angular Measurements- Levelling instruments used for levelling- Introduction to Bearings-Simple problems on levelling and bearings-Contour mapping.

Unit III TRANSPORTATION ENGINEERING, WATER RESOURCES 8 hr AND ENVIRONMENTAL ENGINEERING

Transportation Engineering, Water Resources and Environmental Engineering: Importance of Transportation in Nation's economic development- Types of Highway Pavements- Flexible Pavements and Rigid Pavements - Simple Differences - Basic geometric

design elements of a highway- Camber- Stopping Sight Distance- Super elevation-Introduction.

Water Resources and Environmental Engineering: Sources of water- Quality of water-Specifications and Tests- Introduction to Hydrology- Hydrograph —Rain water Harvesting-Rain water runoff- Water Storage Structures (Simple introduction to Dams and Reservoirs).

PART B: BASICMECHANICAL ENGINEERING

Unit IV INTRODUCTION TO MECHANICAL ENGINEERING AND ENGINEERING MATERIALS 8 hr

Introduction to Mechanical Engineering: Role of Mechanical Engineering in Industries and Society-Technologies in different sectors such as Energy, Manufacturing, Automotive, Aerospace, and Marine sectors.

Engineering Materials - Metals-Ferrous and Non-ferrous, Ceramics, Composites, Smart materials.

Unit V MANUFACTURING PROCESSES AND THERMAL 8 hr ENGINEERING

Manufacturing Processes: Principles of Casting, Forming, joining processes, Machining, Introduction to CNC machines, 3D printing, and Smart manufacturing.

Thermal Engineering— working principle of Boilers, Otto cycle, Diesel cycle, Refrigeration and air-conditioning cycles, IC engines, 2-Stroke and 4-Stroke engines, SI/CI Engines, Components of Electric and Hybrid Vehicles.

Unit VI POWER PLANTS, MECHANICAL POWER TRANSMISSION AND INTRODUCTION TO ROBOTICS 8 hr

Power plants – working principle of Steam, Diesel, Hydro, Nuclear power plants.

Mechanical Power Transmission - Belt Drives, Chain, Rope drives, Gear Drives and their applications.

Introduction to Robotics - Joints & links, configurations, and applications of robotics.

Course Objecti	ive					
	-	computer, peripherals, I/O port			_	
	ystems, Compression, Messors, spreadsheets, and	fultimedia, Antivirus tools and Presentation tools.	Office	Tools	s sucl	1 as
Course Outcon	nes					
1	Students will be able to	o analyze Hardware troubleshoo	oting.			
2	Students will be ab dependencies.	ole to identify Hardware co	mpone	ents a	ınd i	nter
3	Students will be ab viruses/worms.	le to choose safeguard com	puter	syste	ms f	rom
4	Students will be able to	o Create document and power p	oint pr	resenta	ation.	
5	Students will be able to	o develop calculations using spr	eadshe	eets.		
List of Experin	nents					
2	Week-1: PC Hardware & Software Installation 1) Identify the peripherals of a computer, components in a CPU, and functions. Draw the block diagram of the CPU along with the configuration of each peripheral and submit to your instructor. 2) Every student should disassemble and assemble the PC back to working condition. Lab instructors should verify the work and follow it up with a Viva. Also, students must go through the video showing the PC assembling process. A video would be given as part of the course content. Week-2:					the to and deo
	1) Students shoul The lab instruc Viva.	d install MS windows on their tor should verify the installation				
3	should have W as dual boot (V should verify th 2) Every student should be conf BOSS. Lab ins up with a Viva.		should inux. I with a 'compute on with a 'compute on with	be co Lab in Viva. er. Th Wind	onfigu struc e sys lows	tors tem
4	their Local Ar they configure demonstrate to	World Wide Web Connectivity Boot Camp: Stude ea Network and access the Inte e the TCP/IP setting. Final the instructor how to access the et connectivity, instructors must	ernet. ly, stree webs	In the udents attes ar	proc s sho nd em	ess, ould nail.

on the LAN.

	2) Web Browsers, Surfing the Web: Students customize their web browsers with the LAN proxy settings, bookmarks, search toolbars, and pop-up blockers. Also, plug-ins like Macromedia Flash and JRE for applets should be configured.
5	 Week-5: Search Engines & Netiquette: Students should know what search engines are and how to use the search engines. A few topics would be given to the students for which they need to search on Google. This should be demonstrated to the instructors by the student. Cyber Hygiene: Students would be exposed to the various threats on the internet and asked to configure their computers to be safe on the internet. They need to customize their browsers to block popups, and block active X downloads to avoid viruses and worms.
6	Week-6: LaTeX and WORD 1) Word Orientation: The mentor needs to give an overview of LaTeX and Microsoft (MS) Office or equivalent (FOSS) tool word: Importance of LaTeX and MS office or equivalent(FOSS) tool Word as word Processors, Details of the four tasks and features that would be covered in each, Using LaTeX and word – Accessing, overview of toolbars, saving files, Using help and resources, rulers, format painter in word. 2) Using LaTeX and Word to create a project certificate. Features to be covered:- Formatting Fonts in Word, Drop Cap in Word, Applying Text effects, Using Character Spacing, Borders, and Colors, Inserting Header and Footer, Using Date and Time options in LaTeX and Word.
7	 Week-7: Creating project abstract Features to be covered: Formatting Styles, Inserting table, Bullets and Numbering, Changing Text Direction, Cell alignment, Footnote, Hyperlink, Symbols, Spell Check, Track Changes. Creating a Newsletter: Features to be covered:- Table of Contents, Newspaper columns, Images from files and clipart, Drawing toolbar and Word Art, Formatting Images, Textboxes, Paragraphs, and Mail Merge in word.
8	 Week-8: EXCEL Excel Orientation: The mentor needs to tell the importance of the MS Office or equivalent (FOSS)tool Excel as a Spreadsheet tool give the details of the four tasks and features that would be covered in each. Using Excel – Accessing an overview of tool bars, saving Excel files, Using help and resources. 1) Creating a Scheduler - Features to be covered: Gridlines, Format Cells, Summation, auto-fill, Formatting Text. 2) Calculating GPA Features to be covered: Cell Referencing, Formulae in Excel – average, std. deviation, Charts, Renaming and Inserting worksheets, Hyperlinking, Count function.
9	Week-9: 1) LOOKUP/LOOKUP: Split cells, freeze panes, group and outline, Sorting, Boolean and logical operators, Conditional formatting.

1) Students will be working on essential PowerPoint utilities and tools which help them create introductory PowerPoint presentations. PPT Orientation, Slide Layouts, Inserting Text, Word Art, Formatting Text, Bullets and Numbering, Auto Shapes, Lines and Arrows in PowerPoint. 2) Interactive presentations - Hyperlinks, Inserting –Images, Clip Art, Audio, Video, Objects, Tables and Charts. Week-11: 1) Master Layouts (slide, template, and notes), Types of views (basic, presentation, slide slotter, notes, etc.), and Inserting – Background, textures, Design Templates, Hidden slides. Week-12: Al TOOLS – Chat GPT 1) Prompt Engineering: Experiment with different prompts to see how the model responds. Try asking questions, starting conversations, or even providing incomplete sentences to see how the model completes them. 2) Creative Writing: Use the model as a writing assistant. Provide the beginning of a story or a scene description, and let the model generate the rest of the content. This can be a funway to brainstorm creative ideas. 3) Language Translation: Experiment with translation tasks by providing a sentence in one language and asking the model to translate it into another language. Compare the output to see how accurate and fluent the translations are. LEARNING RESOURCES TEXT BOOKS: 1	10	Week-10: POWERPOINT
presentations. PPT Orientation, Slide Layouts, Inserting Text, Word Art, Formatting Text, Bullets and Numbering, Auto Shapes, Lines and Arrows in PowerPoint. 2) Interactive presentations - Hyperlinks, Inserting -Images, Clip Art, Audio, Video, Objects, Tables and Charts. 11		1) Students will be working on essential PowerPoint utilities and
Word Art, Formatting Text, Bullets and Numbering, Auto Shapes, Lines and Arrows in PowerPoint. 2) Interactive presentations - Hyperlinks, Inserting -Images, Clip Art, Audio, Video, Objects, Tables and Charts. 11 Week-11: 1) Master Layouts (slide, template, and notes), Types of views (basic, presentation, slide slotter, notes, etc.), and Inserting - Background, textures, Design Templates, Hidden slides. 12 Week-12: AI TOOLS - Chat GPT 1) Prompt Engineering: Experiment with different prompts to see how the model responds. Try asking questions, starting conversations, or even providing incomplete sentences to see how the model completes them. 2) Creative Writing: Use the model as a writing assistant. Provide the beginning of a story or a scene description, and let the model generate the rest of the content. This can be a funway to brainstorm creative ideas. 3) Language Translation: Experiment with translation tasks by providing a sentence in one language and asking the model to translate it into another language. 		DMPUTER PROGRAMMING LAI Common to all branches of Engineering)	3						
R23CSEL201	Total Contact Hours	45 (P)	L	T	P	C			
	Pre-requisite	NIL	0	0	3	1.5			
Course Object	ive				<u> </u>				
<u> </u>		s hands – on experience and train the	m on	the co	oncep	ots of			
the C- p	rogramming language.								
Course Outcor									
1		trace the execution of programs writt	en in	C lan	guag	e.			
2		elect the right control structure for solving the problem.							
3		which utilize memory efficiently	using	prog	gram	ming			
	constructs like pointers		.1	1.					
4		Execute programs to demonstrate	the	applic	catior	is of			
		concepts of pointers in C.							
1	WEEK 1:	OF EXPERIMENTS							
1		ogramming environment.							
		nvironment and its editors like Vi, V	Jim 8	k Em	acs.	gedit			
	etc.	ivitomient and its editors like vi,	, ,,,,,	~ Еш	ucs,	Scart			
	ii Exposure to Tu	rbo C, gcc							
	<u> </u>	programs using printf(), scanf()							
2	WEEK 2								
	Developing the algoriti	hms/flowcharts for the following sam	ple p	rogra	ms				
	i Sum and average	ge of 3 numbers							
		Fahrenheit to Celsius and vice versa							
	iii Simple interest	calculation							
3	WEEK 3								
		problems using arithmetic expression	S.						
		are root of a given number							
	ii Finding compo								
	-	gle using heron's formulae							
4	iv Distance travel WEEK 4:	ied by an object							
4		al problems using the operator	, nr	ecede	nce	and			
	associativity	in problems using the operator	P	cccac	,,,,,,	una			
	_	llowing expressions.							
		+(D*E) + F*G							
	b. A/B*C-	B+A*D/3							
	c. A+++B	A							
	d. $J = (i++)$								
		num of three numbers using condition 5 subjects in integers, and find the total	_			oat			
5	WEEK 5:	<i>y</i> , , , , , , , , , , , , , , , , , , ,	, '	6-					
	Problems involving if-	then-else structures.:							
	_	gram to find the max and min of for	ır nu	mbers	usir	ng if-			
	else.								
	ii Write a C progr	ram to generate electricity bill.							

	iii Find the roots of the quadratic equation.
	iv Write a C program to simulate a calculator using switch case.
	v Write a C program to find the given year is a leap year or not.
6	WEEK 6:
	Iterative problems:
	i Find the factorial of given number using any loop.
	ii Find the given number is a prime or not.
	iii Compute sine and cos series
	iv Checking a number palindrome
	v Construct a pyramid of numbers.
7	WEEK 7:
	Array manipulation, linear search
	i Find the min and max of a 1-D integer array.
	ii Perform linear search on 1D array.
	iii The reverse of a 1D integer array
	iv Find 2's complement of the given binary number.
	v Eliminate duplicate elements in an array
8	WEEK 8:
	Matrix problems, String operations, Bubble sort
	i Addition of two matrices
	ii Multiplication two matrices
	iii Sort array elements using bubble sort
	iv Concatenate two strings without built-in functions
	v Reverse a string using built-in and without built-in string functions
9	WEEK 9:
	Pointers and structures, memory dereference.
	i Write a C program to find the sum of a 1D array using malloc()
	ii Write a C program to find the total, average of n students using
	structures
	iii Enter n students data using calloc() and display failed students list
	iv Read student name and marks from the command line and display the
	student details along with the total.
	v Write a C program to implement realloc()
10	WEEK 10:
	i Read and print a date using dd/mm/yyyy format using bit-fields and
	differentiate the same without using bit- fields
	ii Create and display a singly linked list using self-referential structure.
	iii Demonstrate the differences between structures and unions using a C
	program.
	iv Write a C program to shift/rotate using bitfields. iv) Write a C program
	to copy one structure variable to another structure of the same type.
11	WEEK 11:
	Simple functions using call by value, solving differential equations using Eulers
	theorem.
	i Write a C function to calculate NCR value.
	ii Write a C function to find the length of a string.
	iii Write a C function to transpose of a matrix.
	iv Write a C function to demonstrate numerical integration of differential
	equations using Euler's method

12	WEEK 12:
	Recursive functions:
	i Write a recursive function to generate Fibonacci series.
	ii Write a recursive function to find the lcm of two numbers.
	iii Write a recursive function to find the factorial of a number.
	iv Write a C Program to implement Ackermann function using recursion.
	v Write a recursive function to find the sum of series.
13	WEEK 13:
	Simple functions using Call by reference, Dangling pointers.
	i Write a C program to swap two numbers using call by reference.
	ii Demonstrate Dangling pointer problem using a C program.
	iii Write a C program to copy one string into another using pointer.
	iv Write a C program to find no of lowercase, uppercase, digits and other
	characters using pointers.
14	WEEK 14:
	File operations
	i Write a C program to write and read text into a file.
	ii Write a C program to write and read text into a binary file using fread()
	and fwrite()
	iii Copy the contents of one file to another file.
	iv Write a C program to merge two files into the third file using command-
	line arguments.
	v Find no. of lines, words and characters in a file vi) Write a C program to
	print last n characters of a given file.

Course Objective

- Students will get exposure to familiarize engineering chemistry and its applications
- Students will get exposure to train the students on the principles and applications of electrochemistry and polymers
- Students will get exposure to introduce instrumental methods, molecular machines and switches.

Course Outcomes 1 The student will be able to analyze the structure of various homo and hetero atomic molecules and also estimate the energies of the molecules using principles of Quantum mechanics and molecular orbital theory. 2 The student will be able to apply the knowledge of modern engineering materials to solve real world problems and adapt to new developments in the field of material science, electronics and energy technology. The student will be able to analyze, compare, make use of and design the 3 batteries, sensors, fuel cells and various electro analytical techniques. 4 The student will be able to select, distinguish and appraise the diversity and versatility of polymers, elastomers, plastics, conducting and biodegradable polymers, their widespread applications in various industries, and their environmental implications The student will be able to have strong foundation in various analytical and 5 spectroscopic techniques enabling him to apply and evaluate in quality control, scientific exploration and in various industries. Demonstrate the ability to identify, synthesize, interpret, categorize, and 6 characterize different materials and their significance to be used as suitable and appropriate engineering materials using the concepts of quantum mechanics, principles of storage devices, electrochemistry, polymer chemistry, and analytical

SYLLABUS

Unit I STRUCTURE AND BONDING MODELS 9 hr

instrumental methods of analysis to propose innovative solutions to engineering

Fundamentals of Quantum mechanics, Schrodinger Wave equation, significance of Ψ and Ψ^2 , particle in one dimensional box

Molecular orbital theory – Bonding in homo- and heteronuclear diatomic molecules – energy level diagrams of O_2 and CO, etc. π -molecular orbitals of butadiene and benzene, calculation of bond order.

Unit II MODERN ENGINEERING MATERIALS 9 hr

Semiconductors - Introduction, basic concept, application

Super conductors - Introduction basic concept, applications.

Supercapacitors - Introduction, Basic Concept-Classification – Applications.

problems/ challenges of simple to complex nature.

Nano materials - Introduction, classification, properties and applications of fullerenes, carbon nanotubes and Graphines nanoparticles

Unit III ELECTROCHEMISTRY AND APPLICATIONS 9 hr

Electrochemical cell, Nernst equation, cell potential calculations and numerical problems, potentiometry- potentiometric titrations (redox titrations), concept of conductivity, conductivity cell,

conductometric titrations (acid-base titrations).

Electrochemical sensors - potentiometric sensors with examples, amperometric sensors with examples. Primary cells - Zinc-air battery, Secondary cells -lithium-ion batteries- working of the batteries including cell reactions; Fuel cells, hydrogen-oxygen fuel cell- working of the cells. Polymer Electrolyte Membrane Fuel cells (PEMFC).

Unit IV **POLYMER CHEMISTRY** 9 hr

Introduction to polymers, functionality of monomers, chain growth and step growth polymerization, coordination polymerization, with specific examples and mechanisms of polymer formation.

Plastics -Thermo and Thermosetting plastics, Preparation, properties and applications of -PVC, Teflon, Bakelite, Nylon-6,6, carbon fibers.

Elastomers–Buna-S, Buna-N–preparation, properties and applications.

Conducting polymers – polyacetylene, polyaniline, – mechanism of conduction and applications.						
Bio-Degr	radable polymers - Poly Glycolic Acid (PGA), Poly Lactic Acid (PLA).					
Unit V	INSTRUMENTAL METHODS AND APPLICATIONS 9 hr					
Electromagnetic spectrum - Absorption of radiation: Beer-Lambert's law.						
UV-Visib	UV-Visible Spectroscopy - electronic transition, Instrumentation,					
IR spectr	coscopy - fundamental modes and selection rules, Instrumentation.					
Chromat	tography-Basic Principle, Classification-HPLC: Principle, Instrumentation and Application

R23MECD201	Total Contact Hours	75(15L+60P)	L	T	P	C	
	Pre-requisite	Basic mathematics, imagination skills	1	0	4	3	

Course Objective:

To enable the students with various concepts like dimensioning, conventions and standards related to Engineering Drawing

Course Outcome	s: On completion of the course, the student should be able to
1	Apply the principles of curves, scales, orthographic and isometric
	projections in engineering drawing.
2	Interpret orthographic projections like front, top and side views related
	to points, lines, planes and solids.
3	Demonstrate the projection of solids in various positions in the first
	quadrant.
4	Examine the principles behind development of surfaces.
5	Develop orthographic and isometric projections of solids.
SYLLARUS	

Unit I

CURVES, SCALES AND POLYGONS 15 hr **Introduction:** Lines, Lettering and Dimensioning, Geometrical Constructions

Constructing regular polygons by general methods.

Curves: construction of ellipse, parabola and hyperbola by general, Cycloids, Involutes, Normal and tangent to Curves.

Scales: Plain scales, diagonal scales and vernier scales.

ORTHOGRAPHIC PROJECTIONS Unit II 15 hr

Orthographic Projections: Reference plane, importance of reference lines or Plane, Projections of a point situated in any one of the four quadrants.

Projections of Straight Lines: Projections of straight lines parallel to both reference planes, perpendicular to one reference plane and parallel to other reference plane, inclined to one reference plane and parallel to the other reference plane. Projections of Straight Line Inclined to both the reference planes

Projections of Planes: regular planes Perpendicular to both reference planes, parallel to one reference plane and inclined to the other reference plane; plane inclined to both the reference planes.

Unit III PROJECTIONS OF SOLIDS 15 hr

Projections of Solids: Types of solids: Polyhedra and Solids of revolution. Projections of solids in simple positions: Axis perpendicular to horizontal plane, Axis perpendicular to vertical plane and Axis parallel to both the reference planes, Projection of Solids with axis inclined to one reference plane and parallel to another plane.

SECTIONS OF SOLIDS AND DEVELOPMENT OF **Unit IV** 15 hr **SURFACES**

Sections of Solids: Perpendicular and inclined section planes, Sectional views and True shape of section, Sections of solids in simple position only.

Development of Surfaces: Methods of Development: Parallel line development and radial line development. Development of a cube, prism, cylinder, pyramid and cone.

Unit V **CONVERSIONS OF VIEWS** 15 hr

Conversion of Views: Conversion of isometric views to orthographic views; Conversion of orthographic views to isometric views.

Computer grap	ohics: Creating 2D&3D drawings of objects including PCB and
Transformations u	using AutoCAD

Students will be able to develop programs for solving real time problems by choosing appropriate data structure concepts. Course Outcomes: Students will be able to explain the role of linear data structures in organizing and accessing data efficiently in algorithms. Students will be able to design, implement, and apply linked lists for dynamic data storage, demonstrating understanding of memory allocation. Students will be able to develop programs using stacks to handle recursive algorithm manage program states, and solve related problems. Students will be able to apply queue-based algorithms for efficient task scheduling a breadth-first traversal in graphs and distinguish between dequee and priority queues, a apply them appropriately to solve data management challenges. Students will be able to devise novel solutions to small scale programming challeng involving data structures such as stacks, queues, Trees List of Experiments Exercise 1: Array Manipulation Write a program to reverse an array. CPrograms to implement the Searching Techniques – Linear &Binary Search ii) CPrograms to implement Borting Techniques – Bubble, Selection and Insertion Sort Exercise 2: Linked List Implementation Develop a program to reverse a linked list traversal and manipulation. Exercise 3: Linked List Applications Exercise 3: Linked List Applications i) Create a program to detect and remove duplicates from a linked list. ii) Implement a dinked list to represent polynomials and performaddition. iii) Implement a double-ended queue (deque) with essential operations. Exercise 4: Double Linked List Implementation i) Implement a double-ended queue (deque) with essential operations. Exercise 5: Stack Operations i) Implement a program to evaluate a postfix expression using a stack. iii) Implement a program to check for balanced parentheses using a stack. Exercise 7: Stack and Queue Applications i) Implement a program to simulate a simple printer queue system.						-		1.5		
Students will be able to develop programs for solving real time problems by choosing appropriate data structure concepts. Course Outcomes: Students will be able to explain the role of linear data structures in organizing and accessing data efficiently in algorithms. Students will be able to design, implement, and apply linked lists for dynamic data storage, demonstrating understanding of memory allocation. Students will be able to develop programs using stacks to handle recursive algorithm manage program states, and solve related problems. Students will be able to apply queue-based algorithms for efficient task scheduling a breadth-first traversal in graphs and distinguish between deques and priority queues, a apply them appropriately to solve data management challenges. Students will be able to devise novel solutions to small scale programming challeng involving data structures such as stacks, queues, Trees List of Experiments Exercise 1: Array Manipulation i) Write a program to reverse an array. i) C Programs to implement the Searching Techniques – Linear &Binary Search ii) C Programs to implement Sorting Techniques – Bubble, Selection and Insertion Sort Exercise 2: Linked List Implementation i) Implement a singly linked list and perform insertion and deletionoperations. ii) Develop a program to reverse a linked list iteratively and recursively. iii) Solve problems involving linked list traversal and manipulation. Exercise 3: Linked List Applications i) Create a program to detect and remove duplicates from a linked list. ii) Implement a linked list to represent polynomials and performaddition. iii) Implement a doubly linked list and perform various operations tounderstar its properties and applications. i) Implement a double-ended queue (deque) with essential operations tounderstar its properties and applications. ii) Implement a vacak using arrays and linked lists. iii) Implement a program to evaluate a postfix expression using a stack. iii) Implement a program to check for balanced pa	Cour	so Objective	1	INII	U	U	3	1.3
